GLOBALG.A.P.

New version v3.1

of the GLOBALG.A.P. CFM
(Compound Feed Manufacturing)
standard:

Summary of the main changes
compared to **version v2.2**

Target:

Help to internalize and understand in a practical and profound way the implication and the changes that the new version of the **GLOBALG.A.P. CFM standard (Compound Feed Manufacturing for animals: livestock and aquaculture)** entails at a level of concepts and key points on the General Regulations and on the checklist, necessary to maintain or achieve the certification.

Addressed to:

- **Professionals of the sector.**
- **Managers, production managers** and **key staff of feed-mills.**
- Quality Control Managers and key members of the **quality team** of the company.
- Responsibles for the implementation of the standard and consultants.
- Whoever can be **interested** in knowing the scope of the changes and its implications of the new version of the standard (farm-assurers, farmers, and fish-farmers users of this type of feed, university students, groups of interest, etc.).

Agenda:

- 16:00h Course presentation. General Regulations and certification process.
- 17:30h Break
- 17:45h Review of the most relevant Control Points. Changes regarding the new version.
- 19:15h Pausa / descanso
- 19:30h Review of the most relevant Control Points. Changes regarding the new version. Closing of the course

Contents - Topics:

- PART 1. Summary of concepts and key points of the General Regulations and the certification process.
- PART 2. Revision of the key Control Points and Compliance Criteria, focussed on the main changes regarding the new version of the standard.

Trainers:

Daniel González
